DEVELOPING STRENGTHS-BASED PROJECT TEAMS  
by Martha Buelte and Connie Plowman

**PROCESS FOR BUILDING/DEVELOPING A TALENT**  
**Example**

<b>Talent Themes:</b>  Achiever®, Discipline®, and Harmony®
<b>Specific Talent:</b>  Drive to get things done efficiently in a collaborative way.
<b>Investment:</b>  Demonstrate the benefits and value to find agreement among the project team to consistently use a Kanban board as a simple, step-by step tracking system.
<b>Strength:</b>  Equipping the project team to collaboratively and systematically keep track of what needs to get done and checking it off the project team's list.
<b>Ways to Use Strength on the Project Team:</b>  Collaboratively create action items assigned in project team meetings, post the action items in a place that is accessible to all project team members, communicate where the action items are posted, and then create a system for marking each action item complete.

Gallup CliftonStrengths® and CliftonStrengths® Themes are registered marks of Gallup, Inc.
